Sustainability

has truly become a part of our everyday lives.

Both businesses and consumers are shifting their focus to better reduce waste and preserve the environment, instead of taking away from it. That is why we believe there is a responsibility, both personally and as a business, to minimize our eco footprints. Our aim is to help current generations, as well as preserve Earth's natural resources for future ones.

In 2009, we launched our first line of 5 products made from 100% post-consumer recycled glass. Using a state-of-the-art facility located in Mexico, and ensuring every product meets USA standards of quality, our line has grown to over 70 items. Thanks to the support from our customers, our consistent growth required us to open a second facility in the Spring of 2016. By upholding a standard of excellence, we are proud to have become the leader in the category of handblown, post-consumer recycled glass, with a national, name-brand recognition.

Switching to recycled glass is a small change that does not require a big sacrifice. To make the transition even easier, we aim to provide you with a variety of classic and modern designs to satisfy your every need.

By continuing our glass recycling, we are fulfilling our pledge of sustainability for our planet.

That is why we hope you join us in working our way towards a clear path.
